

PRITAM KUMAR SINGH

Business Analyst | PropTech & SaaS | Agile Delivery
linkedin.com/in/pritamkumarba | Hyderabad, India

PROFESSIONAL SUMMARY

Results-driven Business Analyst with 1+ year of hands-on experience in Agile/Scrum delivery, requirements elicitation, and end-to-end product lifecycle management within PropTech and property management SaaS environments. Skilled in translating complex stakeholder needs into BRDs, FSDs, user stories, and acceptance criteria, and driving UAT coordination with a 95% pre-production defect resolution rate. Experienced in gap analysis, process mapping, KPI definition, backlog grooming, and cross-functional collaboration with development, QA, and product teams. Proficient in Miro, Wrike, NetSuite, SQL, and AI-assisted design tools. MBA in Finance with strong analytical and reporting foundations.

CORE COMPETENCIES

Business Analysis: Requirements Elicitation, BRD, FSD, User Stories, Acceptance Criteria, Use Cases, Gap Analysis, SDLC

Agile Delivery: Scrum, Sprint Planning, Backlog Grooming, Backlog Management, Change Control, Process Improvement

Project Management: Backlog Ownership, Timely Delivery, Release Coordination, Change Request Handling

Testing & QA: UAT Coordination, Test Case Writing, Defect Tracking, Acceptance Criteria Validation

Process & Design: Process Mapping, Wireframing, User Flows, Process Flow Diagrams, Root Cause Analysis

Data & Reporting: SQL, Advanced Excel, Tableau, KPI Reporting, Dashboards, Bloomberg Terminal

Tools: Miro, Wrike, NetSuite, Postman, Canva, AI-assisted Design Tools

Domain: Property Management SaaS, PropTech, Finance Operations, Payment Processing, HR Operations

Soft Skills: Stakeholder Management, Cross-functional Collaboration, Client Communication, Analytical Thinking

PROFESSIONAL EXPERIENCE

Business Analyst | CuriousRubik (RIOO — In-house Product & Client Delivery) Mar 2025 – Present
Dual-track role: in-house PropTech SaaS product (RIOO) + external client delivery projects

- Owned end-to-end BA lifecycle for RIOO, a live property management SaaS platform — from requirements gathering and wireframe design through UAT sign-off, release coordination, and post-launch analysis.
- Led project management alongside the BA role — owning and prioritising the full product backlog, ensuring timely releases with minimal production bugs, and handling change requests raised after requirements freeze through structured change control.
- Elicited, documented, and managed 30+ user stories with clearly defined acceptance criteria, translating ambiguous stakeholder requirements into structured, development-ready specifications across multiple sprint cycles.
- Produced BRDs, FSDs, process flow diagrams, and user journey maps that served as the single source of truth for development, QA, and product teams — maintaining sprint backlog health above 90% across all cycles.
- Coordinated end-to-end UAT — built test cases from scratch, managed defect tracking lifecycle, and achieved a 95% defect resolution rate prior to every production release across 8+ feature deliveries.
- Performed gap analysis on existing product workflows, identifying process friction points and proposing control enhancements that improved platform efficiency and reduced design-to-approval cycle time.
- Defined KPIs and success metrics for each product release, establishing a closed feedback loop between shipped features and measurable business outcomes; delivered regular KPI and milestone reports to stakeholders and leadership.
- Collaborated with US-based stakeholders in a matrixed, cross-functional environment — facilitating requirement walkthroughs, solution demonstrations, and change control processes to protect delivery timelines.

- Led BA ownership for RIOO's integration into an existing client product, managing full requirements for a UI/UX redesign initiative targeting transition to a modern, high-performance system.
- Applied SQL to analyse product and operational data, supporting business decision-making and process standardisation across property management workflows.

Finance Intern | Jindal Steel & Power Ltd.

Feb 2024 – May 2024

- Mapped and documented Letter of Credit workflows in SAP — capturing payment terms, compliance checkpoints, and transaction flows across sales and purchase cycles to support process controls and audit readiness.
- Streamlined payment reconciliation processes through workflow automation, reducing processing time by 15% and improving finance team operational efficiency.
- Collaborated with audit teams on payroll workflow analysis using Tally ERP, producing structured process documentation that established foundational BA and controls documentation skills.

EDUCATION

MBA — Finance | ICFAI Business School

May 2023 – Feb 2025

Relevant coursework: Financial Risk Management, Strategic Management, Business Analytics, Corporate Finance

BBA | ASBM University

2020 – 2023

CERTIFICATIONS & ACHIEVEMENTS

- Bloomberg Market Concepts (BMC) — Financial markets certification covering economic indicators, currencies, fixed income, and equities
- Tata Steel TomorrowLab SUSTAIN-A-THON 2024 — National sustainability-focused hackathon participant
- BRIDGE Campus Learning Series — Power of Narrative in Crafting Business
